

Agricultural Barforage Product Guide 2027

BARENBRUG

About Us

Barenbrug breed, research and develop UK forage products across the UK and the world. Over 3,000 hectares of UK farmland produces Barenbrug UK grass seed. All Barenbrug UK mixtures are designed to deliver productivity and success for UK farmers.

Making up 65% of utilisable agricultural area, grass is the UK's national crop. Like other crops, grass requires proper management to optimise yields, benefit the environment, and enhance animal health and performance. It takes 17 years on average to release a new variety.

Knutsford Breeding Site

Located in Cheshire, near Manchester, our Knutsford site is the heart of Barenbrug UK's research and development. As our primary breeding and trial centre, it provides the ideal environment for developing and testing new grass varieties, seed mixtures, and agronomic solutions under UK conditions. Through dedicated breeding nurseries and extensive variety trials, we create high-yielding, resilient grasses that deliver proven performance for agriculture and amenity professionals, ensuring our customers benefit from innovative, reliable products backed by rigorous research.

Barenbrug UK are proud of the many industry partnerships that we maintain, helping us excel in many facets of our business.

Barenbrug-AFBI Breeding

For over 30 years, Barenbrug has worked with AFBI to bring high-performing forage grass varieties to UK farmers and will continue to supply these proven varieties for years to come. We currently have 30 ryegrass varieties listed on the England & Wales Recommended Grass and Clover List 2026/2027, 22 of which were bred by AFBI. In the 2026–2027 Grass & Clover Varieties for Scotland, we have 25 first-choice ryegrass varieties, 22 of which were bred by AFBI.

Together, these varieties reflect decades of breeding expertise, delivering the performance, resilience, and forage quality that UK farmers rely on.

New Varieties for 2027

Bartui - Intermediate Diploid Perennial Ryegrass

NEW

Bartui is a new variety developed through Barenbrug's global breeding programme and is highly recognised on the Recommended Grass and Clover List (RGCL) for England and Wales.

	Mean
Early Grazing Yield: 107	105
Spring Grazing Yield: 111	104
2nd Cut Year 1: 104	101
3rd Cut Year 1: 104	101

Bartui combines exceptional spring growth with excellent seasonal performance. Its highly digestible forage, strong persistence, and dense sward make it an ideal choice for both grazing and silage, while helping to suppress weeds and maintain long-term productivity.

Ardress - Late Tetraploid Perennial Ryegrass

NEW

Developed by AFBI in Northern Ireland and available exclusively through Barenbrug, *Ardress* is a Recommended Grass and Clover List (RGCL) variety, delivering exceptional performance for both grazing and silage systems.

	Mean
Total Yield Year 1: 108	105
Total Yield Year 3: 109	103
Spring Grazing Yield: 107	102
Autumn Grazing Yield: 106	99

Ardress produces high-energy, highly digestible forage throughout the grazing season. Strong first and second silage cut performance, combined with good crown rust resistance (6.3), makes it a versatile, high-performing variety for productive, resilient grassland.

More Of Our Top-Performing Varieties

Barwave - Early Tetraploid Perennial Ryegrass

	Mean
Total Yield Year 1: 112	102
Total Yield Year 3: 104	99
Early Grazing Yield: 121	108
1st Cut: 100	91

Highest total yields in its class, with particularly strong early and late spring growth. Consistent quality, good winter hardiness, and crown rust resistance. Low plant density.

Galgorm - Intermediate Diploid Perennial Ryegrass

	Mean
Grazing Yield: 106	102
Spring Grazing Yield: 109	104
Total Yield Year 3: 105	102
Late Summer Grazing Yield: 111	104

Absolutely excellent all-rounder variety in this class, with very high yields under grazing and conservation. Lovely even seasonal growth curve, and highest overall conservation yield in its class.

Tollymore - Intermediate Tetraploid Perennial Ryegrass

Grazing Yield	Mean
102	100
Early Grazing Yield	
107	100
Spring Grazing Yield	
104	100
Late Summer Grazing Yield	
103	99

A standout all-round variety, with great grazing performance. Very high yield of dry matter and ME, with a strong and consistent seasonal growth curve.

Banbridge - Intermediate Tetraploid Perennial Ryegrass

Total Yield Year 1	Mean
104	100
Grazing Yield	
108	100
1st Cut	
107	99
4th Cut	
100	95

A particularly strong variety, with high performing conservation traits. Very high yield of dry matter and ME, with a strong silage cut growth curve. The strongest in its class that is currently available from Barenbrug.

Seagoe - Intermediate Tetraploid Perennial Ryegrass

Total Yield Year 1	Mean
103	100
Total Yield Year 3	
104	101
Early Grazing Yield	
104	100
1st Cut	
108	99

Extremely strong first cut and overall yields, particularly under conservation. Good quality and crown rust resistance, this variety is a firm all-round performer.

Callan - Late Diploid Perennial Ryegrass

Total Yield	Mean
99	96
Early Grazing Yield	
94	85
Spring Grazing Yield	
99	92
1st Cut	
104	101

A dual-purpose variety with great spring growth. Great mildew resistance.

Dundrod - Late Diploid Perennial Ryegrass

	Mean
Total Yield Year 1	
101	97
Early Grazing Yield	
95	85
Autumn Grazing Yield	
103	98
1st Cut	
112	101

Performs very well under both cutting and grazing management. Extremely strong first cut yield and crown rust resistance.

Richhill - Late Tetraploid Perennial Ryegrass

	Mean
Total Yield Year 1	
108	105
Total Yield Year 3	
108	103
1st Cut	
118	110
3rd Cut	
102	98

Top-performing late tetraploid variety, excelling in conservation, with tremendous first cut yield, and strong yields in all subsequent cuts.

Ballintoy - Late Tetraploid Perennial Ryegrass

	Mean
Grazing Yield	
104	103
Total Yield Year 3	
105	103
1st Cut	
112	110
4th Cut	
103	102

Excellent variety under both cutting and grazing. Very strong season growth curve and ME yields.

Baronaise - Timothy

	Mean
Grazing Yield	
103	98
Early Grazing Yield	
115	99
Late Summer Grazing Yield	
105	98
Autumn Grazing Yield	
106	99

One of the leading timothy varieties for seasonal production and forage quality. The top-performing grazing option and highest quality variety in class makes *Baronaise* an excellent choice.

Product Selector

Our products have been carefully designed using species and varieties to suit your farm's requirements.

Looking for what's in the bag? View the **Product and Composition Index on page 42** for full product details.

Guide: Available in versions with or without clover **Multi-species**

Grass Products

Product Name	Description	Uses	Specification	Ley Length	Page No.
Barbumper	Westerwold & Italian mixture for fast establishment and high yields, ideal for autumn sowing after a crop.	☑ Cover ☑ Conserved Feed		Short	12
Bar Italian	Italian ley with terrific yield and quality, fitting easily into all rotations.	☑ Cover ☑ Conserved Feed		Short	13
Hybrid 4x4	Hybrid ley designed for 4 silage cuts per year.	☑ Conserved Feed		Medium	14
Hybrid 4x4 Red	All the advantages of Hybrid 4x4, with red clover for protein content & nitrogen fixation.	☑ Conserved Feed		Medium	14
Prota Sile	A medium term ley with red & white clover for quality & nitrogen fixation.	☑ Graze ☑ Conserved Feed		Medium	15
Hybrid Cut & Graze	A flexible ley with hybrid ryegrass content for extra biomass & speed of emergence.	☑ Graze ☑ Conserved Feed		Medium	16
Combi	An all intermediate heading date product designed for maximum flexibility and ease of management.	☑ Graze ☑ Conserved Feed		Long	17
Cut & Graze	A combination of intermediate and late heading dates for management flexibility.	☑ Graze ☑ Conserved Feed		Long	18
Permanent Supreme	An all late heading date product ideal for silage cuts and intensive grazing.	☑ Graze ☑ Conserved Feed		Long	19
Highlander	Upland product for sheep & beef grazing in tough conditions.	☑ Graze		Long	20
Barmix	A high-quality multispecies sward, utilising a diversity of grass rooting structures for performance in challenging environments.	☑ Graze ☑ Conserved Feed		Long	21
Overseeder	Competitive grasses to rejuvenate long term leys.	☑ Overseeding ☑ Graze ☑ Conserved Feed		Medium	22

Environmental Schemes

Product Name	Description	Uses	Specification	Ley Length	Page No.
SFI CSAM3 Barherbal	A multispecies mixture for added protein & minerals in the diet, as well as environmental benefits.	☑ Graze ☑ Conserved Feed		Long	30
SFI CSAM3 High Production Herbal	Maximum biomass production & very high quality yield.	☑ Graze ☑ Conserved Feed		Long	31
SFI CSAM3 Barmix	A biodiverse mix based on one of our top-selling products.	☑ Graze		Long	32
SFI CSAM3 Oversow	A mix of herbs & legumes for finishing or overseeding.	☑ Overseeding ☑ Graze ☑ Conserved Feed		Short	33

For more products visit page 24 onwards. For Environmental Options visit page 29.

Contact your local Barenbrug supplier, one of our representatives throughout the UK or visit our website for a range of tools to help you get the best from your grassland **www.barenbrug.co.uk/agriculture**

Bar Bumper

Cover crop, forage booster, & break crop solution

Ley Length: Short | For Cutting

- Quick establishment and rapid growth
- Flexible in rotations with 2-18 month longevity
- Spring or autumn sown
- Very productive for conserved feed or extra grazing; a great source of extra feed for lambing or calving
- Ryegrass-only mixture allows for more flexible weed control
- Provides soil stability and habitat, and reduces water and nutrient run-off and weed incursion

What's in the bag?

In the bag	Kg
Italian Ryegrass Tetr.	12.50
Westerwold Tetr.	12.50

Sowing Rate: 31kg per hectare, 12.5kg per acre | Pack size: 25kg

Bar Italian

A highly productive Italian ryegrass mixture

Ley Length: Short | For Cutting

- Large amounts of quality home-grown feed
- Early spring growth and a long growing season
- Used for silage
- Short ley length is flexible in rotations and helps diversification of land use and reseeding plans
- Ryegrass-only design improves weed control options
- Can be used for production of anaerobic digestion biomass

What's in the bag?

In the bag	Kg
Italian Ryegrass Dip.	12.50
Italian Ryegrass Tetr.	12.50

Sowing Rate: 31kg per hectare, 12.5kg per acre | Pack size: 25kg

Hybrid 4x4 & Hybrid 4x4 Red

4 cuts, 4 years

Ley Length: Medium | For Cutting

- A hybrid ryegrass product for excellent biomass production
- High quantity and quality of conserved feed
- Strong early spring growth
- A medium-term option for flexibility in rotations
- Grass-only option for flexible weed control
- Red clover option for high protein feed and nitrogen fixation

Barlaunch

	Mean
Early Spring Growth: 118	107
Year of Sowing: 120	90
Crown Rust: 8.3	7
Ground Cover Yr 3: 46	42

Hybrid 4x4: what's in the bag?

In the bag	Kg	Species
Barclamp	2.00	Hybrid Ryegrass Dip.
Barlaunch	4.00	Hybrid Ryegrass Dip.
Kirial	4.00	Hybrid Ryegrass Tetr.
Bannfoot	4.00	Hybrid Ryegrass Tetr.

Sowing Rate: 35kg per hectare, 14kg per acre
Pack size: 14kg

Hybrid 4x4 Red: what's in the bag?

In the bag	Kg	Species
Barclamp	2.00	Hybrid Ryegrass Dip.
Barlaunch	3.00	Hybrid Ryegrass Dip.
Kirial	3.00	Hybrid Ryegrass Tetr.
Bannfoot	3.00	Hybrid Ryegrass Tetr.
Prota Red	3.00	Red Clover Mix

Sowing Rate: 35kg per hectare, 14kg per acre
Pack size: 14kg

Prota Sile

High output, high protein grass & clover ley

Ley Length: Medium | For Cutting & Grazing

- Hybrid and perennial ryegrass for an extended growing season and great biomass production
- Suitable as an intensive cutting mix for high quality conserved feed
- Can be grazed where appropriate, particularly suitable for finishing young stock
- Valuable nitrogen fixation contribution from red and white clover
- Highly palatable and digestible

Tollymore

	Mean
Grazing Yield: 102	100
Early Grazing Yield: 107	100
Spring Grazing Yield: 104	100
Late Summer Grazing Yield: 103	99

What's in the bag?

In the bag	Kg	Species
Barclamp	3.75	Hybrid Ryegrass Dip.
Kirial	3.00	Hybrid Ryegrass Tetr.
Banbridge	2.00	Perennial Ryegrass Intermediate Tetr.
Tollymore	2.00	Perennial Ryegrass Intermediate Tetr.
Prota Red	3.00	Red Clover Mix
Prota White	0.25	White Clover Mix

Sowing Rate: 35kg per hectare, 14kg per acre | Pack size: 14kg

Hybrid Cut & Graze

Spring focused blend of hybrid & perennial ryegrasses

Ley Length: Medium | For Cutting & Grazing

- Dual-purpose product, suitable for cutting and grazing
- Excellent spring growth for a great first cut or strong turnout
- Balanced seasonal growth
- Extra forage quantity boost from hybrid ryegrasses, and includes our best yielding intermediate diploid and tetraploid perennial ryegrasses

Banbridge

Total Yield Yr 1	Mean
104	100
Grazing Yield	
108	100
1st Cut	
107	99
4th Cut	
100	95

What's in the bag?

In the bag	Kg	Species
Barclamp	2.00	Hybrid Ryegrass Dip.
Bannfoot	2.75	Hybrid Ryegrass Tetr.
Galgorm	3.00	Perennial Ryegrass Intermediate Dip.
Tollymore	2.00	Perennial Ryegrass Intermediate Tetr.
Banbridge	3.50	Perennial Ryegrass Intermediate Tetr.
Prota White	0.75	White Clover Mix

Sowing Rate: 35kg per hectare, 14kg per acre | Pack size: 14kg
Available without clover

Combi

Regionally tailored option for ultimate management flexibility

Ley Length: Long | For Cutting & Grazing

- An intermediate heading date product for early season growth and ease of quality management
- Persistent, high-yielding and palatable mix that is designed for management flexibility
- Season-long growth, with strong growth in the shoulder seasons
- Balance of diploid and tetraploid varieties to balance resilience with quality

Bartui

Early Grazing Yield	Mean
107	105
Spring Grazing Yield	
111	104
2nd Cut Yr 1	
104	101
3rd Cut Yr 1	
104	101

What's in the bag?

In the bag	Kg	Species

No Clover	-	-	
Timothy Only	✓	-	15kg
Timothy & Clover	✓	✓	15kg

Cut & Graze

A dual-use product with a range of heading dates for a strong growth curve

Ley Length: Long | For Cutting & Grazing

- A spread of heading dates for strong growth in spring and summer, helping to balance peak production
- High performing varieties for high yield and quality feed
- Balance of diploid and tetraploid varieties to balance resilience and quality/palatability

Ardress

	Mean
Total Yield Yr 1	105
Total Yield Yr 3	103
Spring Grazing Yield	102
Autumn Grazing Yield	99

What's in the bag?

In the bag	Kg	Species
Bartui	3.00	Perennial Ryegrass Intermediate Dip.
Moira	2.25	Perennial Ryegrass Intermediate Dip.
Banbridge	2.00	Perennial Ryegrass Intermediate Tetr.
Callan	3.50	Perennial Ryegrass Late Dip.
Ardress	2.50	Perennial Ryegrass Late Tetr.
Prota White	0.75	White Clover Mix

Mixture Variations

Mixture Option	Timothy	Clover	Notes
Standard	-	✓	
No Clover	-	-	
Timothy Only	✓	-	15kg
Timothy & Clover	✓	✓	15kg

Sowing Rate: 35kg per hectare, 14kg per acre | Pack size: 14kg

Permanent Supreme

Regionally tailored option for intensive production for the long term

Ley Length: Long | For Cutting & Grazing

- All late heading date varieties make quality management easy
- Dense and productive mixture for intensive grazing or cutting
- Balanced growth profile for the whole season - season-long delivery of quantity and quality forage
- Diploid content makes the stand resilient; tetraploid content improves palatability and feed quality

Richhill

	Mean
Total Yield Yr 1	105
Total Yield Yr 3	103
1st Cut	110
3rd Cut	98

What's in the bag?

In the bag	Kg	Species
Dundrod	3.00	Perennial Ryegrass Late Dip.
Callan	4.00	Perennial Ryegrass Late Dip.
Ardress	3.25	Perennial Ryegrass Late Tetr.

Sowing Rate: 35kg per hectare, 14kg per acre | Pack size: 14kg

Highlander

Durable upland solution

Ley Length: Long | For Grazing

- Designed for challenging and upland areas
- Dense base from creeping red fescue helps to make this product more hoof proof
- Excellent early spring growth for lambing or turnout
- Winter hardy

Galgorm

Grazing Yield	Mean
106	102
Spring Grazing Yield	
109	104
Total Yield Yr 3	
105	102
Late Summer Grazing Yield	
111	104

What's in the bag?

In the bag	Kg	Species
Barwave	2.00	Perennial Ryegrass Early Tetr.
Strangford	2.00	Perennial Ryegrass Intermediate Dip.
Galgorm	2.00	Perennial Ryegrass Intermediate Dip.
Ballyvoy	2.75	Perennial Ryegrass Late Dip.
Ballintoy	2.25	Perennial Ryegrass Late Tetr.
Baronaise	1.25	Timothy
Barustic	2.00	Strong Creeping Red Fescue
Prota White	0.75	White Clover Mix

Sowing Rate: 37kg per hectare, 15kg per acre | Pack size: 15kg

Barmix

A bestselling mixture designed to be resilient & nutritious in challenging environments

Ley Length: Long | For Cutting & Grazing

- A multispecies grass mix, providing benefits from diverse grass rooting structures
- Modern cocksfoot and tall fescue varieties are softer and finer, for better palatability, digestibility and ease of management
- Long growing season
- Tolerant to periods of dry and wet conditions

Baronaise

Grazing Yield	Mean
103	98
Early Grazing Yield	
115	99
Late Summer Grazing Yield	
105	98
Autumn Grazing Yield	
106	99

What's in the bag?

In the bag	Kg	Species
Crossgar	2.25	Perennial Ryegrass Late Dip.
Richhill	3.00	Perennial Ryegrass Late Tetr.
Bardoux	4.00	Tall Fescue
Barcuby	2.00	Tall Fescue
Archibaldi	1.00	Cocksfoot
Baronaise	1.00	Timothy
Prota White	0.75	White Clover Mix

Sowing Rate: 35kg per hectare, 14kg per acre | Pack size: 14kg
Available without clover

Overseeder

Restores productivity to a long term ley

Ley Length: Medium | For Cutting & Grazing

- Designed for overseeding fields that need a boost until they can be resown
- Flexible product for use in fields used for cutting or grazing
- Suitable for any class of livestock
- Increases the proportion of productive ryegrass in the sward
- Improves quality and palatability of the sward
- Improves nutrient efficiency of the sward

Seagoe

	Mean
Total Yield Yr 1	
103	100
Total Yield Yr 3	
104	101
Early Grazing Yield	
104	100
1st Cut	
108	99

What's in the bag?

In the bag	Kg	Species
Bannfoot	7.00	Hybrid Ryegrass Tetr.
Seagoe	6.00	Perennial Ryegrass Intermediate Tetr.
Bijou	5.50	Perennial Ryegrass Late Tetr.
Prota White	1.50	White Clover Mix

Sowing Rate: 25kg per hectare, 10kg per acre | Pack size: 20kg
Available without clover

Clovers

Benefits of including clover

Clover offers environmental and sustainability benefits as well as productive, protein-rich forage for livestock.

- Reduces requirement for purchased fertiliser by fixing nitrogen
- Increases protein content of forage
- Increases palatability and intake of forage
- Food source for pollinators
- Annual clover varieties are available, providing options for rotations and cover crops

Clover Blends

A blend of white clover varieties, to optimise performance across a variety of environmental and management conditions.

- Fixes atmospheric nitrogen, up to 100-150kg N/ha/yr
- Blend of small, medium and large-leaved varieties
- Suitable for any management situation

Pack size: 5kg | **Sowing rate:** 1kg per acre

A blend of red clover varieties, to optimise performance across a variety of environmental and management conditions.

- Fixes atmospheric nitrogen, up to 150-200kg N/ha/yr
- Suited to cutting systems because of a more erect growth habit, deep taproot, and crown growing point

Pack size: 5kg | **Sowing rate:** 3kg per acre

A unique blend of red and white clovers, combining the benefits of both in one mixture.

- A variety of root structures, flowering times, leaf sizes, and growth habits for benefits to biodiversity and productivity

Pack size: 5kg | **Sowing rate:** 3kg per acre

Brassicas, Legumes & Herbs

Non-grass forage crops are a valuable tool for meeting the changing feed and energy requirements throughout the year to supplement a pasture system.

Which Crops To Sow?

Key considerations:

- Maturity date - when feed is required and how fast it grows
- Stock class and nutritional requirements
- Environmental considerations such as soil type, rainfall, and average temperatures
- Ease of management in existing farm system
- Single graze or multiple graze
- Pest cycles, particularly of weeds
- Reseeding rotation

Sowing & Utilisation Guide	January	February	March	April	May	June	July	August	September	October	November	December
STUBBLE TURNIP	USE	USE		SOW	SOW		SOW	SOW	USE	USE	USE	USE
FORAGE RAPE						SOW	SOW	SOW		USE	USE	USE
KALE	USE	USE	USE	SOW	SOW	SOW				USE	USE	USE
LUCERNE			SOW	SOW	SOW	USE	USE	USE	USE			
VETCH	USE	USE	SOW	SOW	SOW	USE	USE	USE	SOW	SOW	USE	USE
PLANTAIN			SOW	SOW	USE	USE	USE	SOW	SOW	USE		
CHICORY			SOW	SOW	USE	USE	USE	SOW	SOW	USE		

Suggested timings only; sowing and use will vary by regional conditions and farm management systems.

Brassicas

Barcoli Forage Rape

BARCOLI is a flexible forage option that can be spring sown for a late summer feed or autumn sown for winter grazing.

Advantages

- Good regrowth
- Excellent winter keeping
- Good aphid tolerance
- Fast growing leafy crop
- High protein content
- Flexible sowing period
- Sheep, beef or dairy production

Sowing rate: 2.5-4kg/acre (6-10kg/ha)

☑ Sow spring or summer ☑ 90-110 days to maturity ☑ Strip graze ☑ Utilise autumn & winter

Barkant Stubble Turnip

BARKANT is a multi-graze stubble turnip, suitable for both sheep and cattle.

Advantages

- Diploid turnip with a purple tankard root
- Quick to establish
- High leaf production
- High dry matter and sugar content
- Flexible sowing period
- Sheep, beef or dairy production
- Strip grazing prevents yield and quality losses from trampling and polluting

Sowing rate: 2kg/acre; 5kg/ha

☑ Sow spring or summer ☑ 60-90 days to maturity ☑ Strip graze ☑ Utilise autumn & winter

Legumes

Artémis Lucerne

A highly nutritious forage for livestock, combining good digestibility with high protein.

Well managed, this perennial crop can persist for up to 5 years and performs well in free-draining, drier environments.

Advantages

- Dual-purpose cutting or grazing
- High quality and high protein, easily digested
- Deep taproots lend lucerne drought tolerance and nutrient use efficiency, and help to improve soil structure and drainage

Limitations

- Requires soil pH above 6.5 and high levels of P to establish
- Requires specialised management

Sowing rate: 10kg/acre (20-25kg/ha)

☑ Sow spring ☑ Grazing/Silage

Barvicos Vetch

Delivers rapid soil coverage, and is highly productive and rich in protein.

With vigorous growth, vetch is an ideal cover crop. It is winter-hardy and will establish and grow well on most soil types, helping to soak up nutrients and hold down soil.

Advantages

- Deep rooting and improves soil structure
- Can be sown either as monoculture or as part of mixtures with other species, such as short term grasses
- Good resistance to colder temperatures
- Good resistance to disease
- Legume that provides nitrogen fixation and dietary protein

Sowing rate: Sown on its own: 16-20kg/acre (40-50kg/ha). In a grass mixture: 8-10kg/acre (20-25kg/ha).

☑ Sow spring & autumn ☑ 70-100 days to maturity ☑ Graze, cut & cover crop ☑ Utilise summer or winter

Herbs

Commander

Chicory

A mineral-rich herb with a long taproot, aiding drainage and soil structure. COMMANDER produces significant yields of high protein forage.

Advantages

- Can be used as a cover crop
- Recovers quickly after grazing
- Deep taproot, delivering tolerance in dry periods
- Can be grown alone or in mixes
- High mineral content
- High protein content
- Tolerant to frost

Sowing rate: 1.25-2kg/acre (5kg/ha) in a grass mixture, 3kg/acre (7.5kg/ha) with clover

☑ **Sow spring & autumn** ☑ **Graze before stem extension. Leave 8cm residual**

Captain

Plantain

Used to boost production and for biodiversity and nutritional quality in grass mixtures. Suited to many soil types.

Advantages

- High feed value
- High protein
- Multi-graze
- Can be grown alone or in mixes
- Tap-rooted to increase diversity of rooting structures in a mix

Sowing rate: 0.5kg/acre (1.25kg/ha) in a grass mixture, 4-5kg/acre (10-12kg/ha) as a special purpose crop

☑ **Sow spring & autumn** ☑ **Grazing. Leave 8cm residual**

Environmental & Stewardship

British farmers play a vital role in enhancing the British countryside, maintaining habitats for native plants and animals, protecting watercourses and supporting wildlife, all in addition to food and feed production.

Farming has been subject to various pressures, from environmental to political, but in the UK a fundamental shift is happening in governmental funding. In England, the introduction of the Environmental Land Management schemes, made up of Sustainable Farming Incentive (SFI) and Countryside Stewardship (CS), incentivises specific production practices and can be a useful option to supplement farm income. At Barenbrug, we have developed a range of products which are suitable for these programmes.

For a range of products, and information on how they can be used on farm, please check out www.barenbrug.co.uk/agricultural/environmental-schemes/products

SFI CSAM3 Barherbal

A biodiverse mixture for animal performance

Ley Length: Long | For Cutting & Grazing

- Herbs and clovers in a productive grass mixture, for biodiversity that's easy to manage
- Mixture of heading date perennial ryegrasses to extend peak production
- Herbs provide minerals and trace elements
- Clovers provide nitrogen fixation and protein content
- Diverse rooting structures
- Palatable and great for animal intake and performance

Barherbal SFI CSAM3: what's in the bag?

In the bag	Kg	Species
Gosford	2.00	Perennial Ryegrass Intermediate Dip.
Moira	1.50	Perennial Ryegrass Intermediate Dip.
Seagoe	2.00	Perennial Ryegrass Intermediate Tetr.
Callan	2.00	Perennial Ryegrass Late Dip.
Bijou	3.00	Perennial Ryegrass Late Tetr.
Baronaise	0.50	Timothy
Commander	0.45	Chicory
Captain	0.45	Plantain
Prota Red	1.30	Red Clover Mix
Prota White	0.80	White Clover Mix

Sowing Rate: 35kg per hectare, 14kg per acre
Pack size: 14kg

Barherbal SFI CSAM3 - No Chicory: what's in the bag?

SFI CSAM3 Oversow

A blend of chicory, plantain & clovers

Ley Length: Short | For Cutting & Grazing

- Can be used to oversow legumes and herbs into existing grass leys
- Can also be used on its own as a grazing finishing mix for young stock
- Leafy and high quality feed with strong summery growth
- Highly digestible and palatable to facilitate live weight gains
- Herbs provide minerals and trace elements, and taproots help improve soil structure and drainage
- Legumes provide nitrogen fixation and dietary protein

SFI CSAM3 Oversow: what's in the bag?

In the bag	Kg	Species
Commander	1.60	Chicory
Captain	1.60	Plantain
Prota Red	4.20	Red Clover Mix
Prota White	2.60	White Clover Mix

2.5kg/acre oversown - 4 acre pack

HUNTERS
GRASS SEED

Wildflowers

Our range of wildflowers include both annual and perennial mixtures and can be pure wildflower or mixed with grass to satisfy a range of situations and requirements. Explore all our wildflower ranges online by visiting:
www.barenbrug.co.uk/landscaping/wildflowers/products

For further help and advice, discover our Wildflowers Guide online at www.barenbrug.co.uk/landscaping-resources

About Hunters Grass Seed

Hunters remains synonymous with quality and value for money. As a subsidiary of Barenbrug UK Ltd you can be assured that the expertise Barenbrug UK has developed over the last 120 years is brought to the Hunters range of products.

Designed for high quality feed production with the excellent varieties that are the hallmark of Barenbrug UK, Hunters products are proven to perform for UK farmers.

For more information, contact your regional specialist; details can be found on page 46.

Hunters Sweetgrass

A flexible mix with timothy and white clover for added palatability and feed quality

Ley Length: Long | For Cutting & Grazing

- Flexible mix for grazing, cutting or mixed systems
- Dense, resilient sward from diploid and tetraploid balance
- High feed quality to support meat and milk production
- Extended seasonal performance from intermediate and late varieties
- White clover for nitrogen fixation and improved protein
- Timothy for palatability and performance in cold, wet soils

What's in the bag?

In the bag	Kg	Species
Gosford	4.00	Perennial Ryegrass Intermediate Dip.
Seagoe	2.00	Perennial Ryegrass Intermediate Tetr.
Glenarm	4.25	Perennial Ryegrass Late Dip.
Bijou	2.00	Perennial Ryegrass Late Tetr.
Baronaise	1.00	Timothy
Prota White	0.75	White Clover Mix

Available in 14kg one acre packs

Hunters Graze & Sile

A flexible, 100% ryegrass dual-purpose mix with excellent feed potential

Ley Length: Long | For Cutting & Grazing

- High yields for grazing, cutting or mixed systems
- Excellent feed quality throughout the season
- Strong ground cover and winter hardiness across the UK
- 100% ryegrass mix for greater weed control flexibility
- Intermediate and late varieties support early growth and extended seasonal production
- Diploid and tetraploid blend for sward density, resilience and feed quality

What's in the bag?

In the bag	Kg	Species
Gosford	4.00	Perennial Ryegrass Intermediate Dip.
Seagoe	2.50	Perennial Ryegrass Intermediate Tetr.
Glenarm	5.00	Perennial Ryegrass Late Dip.
Bijou	2.50	Perennial Ryegrass Late Tetr.

Available in 14kg one acre packs

Hunters Supersward

A grazing and cutting ley with white clover for added quality

Ley Length: Long | For Cutting & Grazing

- Easy to manage in grazing, cutting, or mixed systems
- Intermediate and late heading varieties extend spring production
- Diploid and tetraploid blend improves sward density, resilience, persistence, and feed quality
- White clover boosts protein and feed value while helping reduce nitrogen inputs through fixation

What's in the bag?

In the bag	Kg	Species
Gosford	4.00	Perennial Ryegrass Intermediate Dip.
Seagoe	2.50	Perennial Ryegrass Intermediate Tetr.
Glenarm	4.75	Perennial Ryegrass Late Dip.
Ballintoy	2.00	Perennial Ryegrass Late Tetr.
Prota White	0.75	White Clover Mix

Available in 14kg one acre packs

Hunters Equestrian

Well managed grass can provide most of a horse's feed requirement and Barenbrug equine mixtures are designed especially for horses.

General Purpose

Hardwearing general-purpose mixture designed to withstand the pressures of equestrian use and provide good quality grazing for horses.

- Produces a dense turf
- Strong rooting system, making the sward hardwearing and persistent
- Yields good levels of effective roughage, ideal for a fit and healthy equine gut

In the bag	
70%	Perennial Ryegrass
16%	Strong Creeping Red Fescue
8%	Meadow Fescue
6%	Timothy

Sowing rate: 14kg/acre for full reseed or 10kg/acre for an oversow | Pack size: 10kg

Traditional Meadow

Formulated to recreate the nutritional characteristics of a natural habitat. The mixture is ryegrass-free and uses species with a less aggressive growth habit.

- Species which tolerate a horse's low grazing height
- High in effective fibre for gut health

In the bag	
25%	Tall Fescue
25%	Strong Creeping Red Fescue
20%	Meadow Fescue
15%	Timothy
15%	Smooth-stalked Meadow Grass

Sowing rate: 14kg/acre for full reseed or 10kg/acre for an oversow | Pack size: 10kg

Barenbrug

Grass experts since 1904

Our profession is plant breeding; selecting and developing quality varieties with the essential, unique characteristics to meet the ever-increasing demands from farmers for top quality forage grass, environmental and sustainable crops.

From its founding days in 1904 the Royal Barenbrug Group has grown into a global seed company with breeding and research stations on 6 continents.

Still privately owned, our knowledge and experience of grass seed is second to none.

We specialise in plant breeding, seed production and the international marketing of forage grass, forage crops and turf grasses.

With operating companies in 18 countries on 6 continents, we have been the leading grass seed business in the world for over 120 years.
